

I'm concerned about our info coming from only a few ownership sources. I believe diversity in reporting news is of the utmost importance. The current rules are no more antiquated than is our nation's constitution. On a personal note, Kerrville's ONLY cable TV source (TimeWarner) has recently removed TheWeatherChannel from the 'Basic' lineup. In light of this week's deadly weather in the midwest, wouldn't one think TheWeatherChannel is nothing short of a safety issue?.....is there anything that can be done about requiring TheWeatherChannel, on cable, as a public service?
